

IAX Termination Providers Requirement for Listing

In order to be recognized on the Digium website under the IAX Termination Providers, a business or organization must meet the following requirements:

- 1) The business or organization have been actively terminating traffic for a minimum of three months.
- 2) Three verifiable customers of the business or organization must provide to Digium referrals; including, information relating to the service and support provided by the business or organization, and the experiences of the customers.
- 3) The equipment of the business or organization must be implemented as a facilities-based provider.
- 4) Digium manufactured T1 or E1 hardware must be used as the direct means of voice termination by IAX2 gateways.
- 5) Business or organization's upstream provider must document that a minimum of one million minutes of voice traffic per month using the IAX2 VoIP protocol have been terminated by the business or organization for a minimum of three consecutive months including the month prior to application for listing.
